Talia:

Please place this e-mail chain into the next batch of correspondence to the Board for the next time Brushy Brook appears on the agenda.

Thank you  
Jim

Jim

I wrote Brian Rosso, acting town manager/Financial director of Hopkinton about the school budget and the impact on the town and asked permission to send his response to the planning board which he agreed

\$3.5 million defect will be a lot of money to the town to absorb. See Brian's response

Please read and forward to the planning board and would you make this as part of the documents associated with the meeting for all to see for the October 6<sup>th</sup> planning board meeting

**Subject:** RE: school budget

Thank You Brian

I had mentioned once before that the town should look into purchasing this property. I do not know what the town would/could do with the property but once paid off that would be the end (I THINK).

The \$3.5 million defect for each year is for LIFE

Our back roads (possibly 280 cars per day), even with modification and the schools cannot handle this project

Could you attend one of the planning board meeting and let the board know what is happening

May I send this letter to the planning board ?

This property should have gone to solar

Thank you

John Orlandi

**Subject:** RE: school budget

Hey John,

Here is a quick calculation that makes some general assumptions, such as the Chariho Budget will not go up and State Aid will be level-funded (both of which will never happen). Chariho budget will continue to go up, and state aid seems to be trending downward.

It is also worth noting that all 140 houses will go up and be occupied in the same fiscal year. We could assume that the increase of roughly \$3.5M in education expense will come over 2-3 years once construction begins—still a catastrophic impact on Hopkinton taxpayers. This has me very concerned for the Town.

Let me know if you have any questions.

Brian M. Rosso

Mr. Brian Rosso Acting Town Manager/ Financial Director

I need a little information from you, as you know a developer is planning to build 140 houses at Brushy Brook on Dye Hill Rd, Hope Valley.

With the national average at 1.93 kids per house, this averages out to 270 children once completed.

I would like to know how much is this going to affect the town school budget per year?

I may use this information at one of the planning board meetings.

Thank You  
John Orlandi
